Implement your own stack (either with a struct or a class) and use it to write a program that will solve an equation in reverse Polish notation. Your equation coming in will only be single digit positive integers but your answer can be in negative floating point.

```
H:\Documents\CPCS1160\Lab 9\Lab9.exe
Enter an equation543--643++/
Solution 0.307692
```
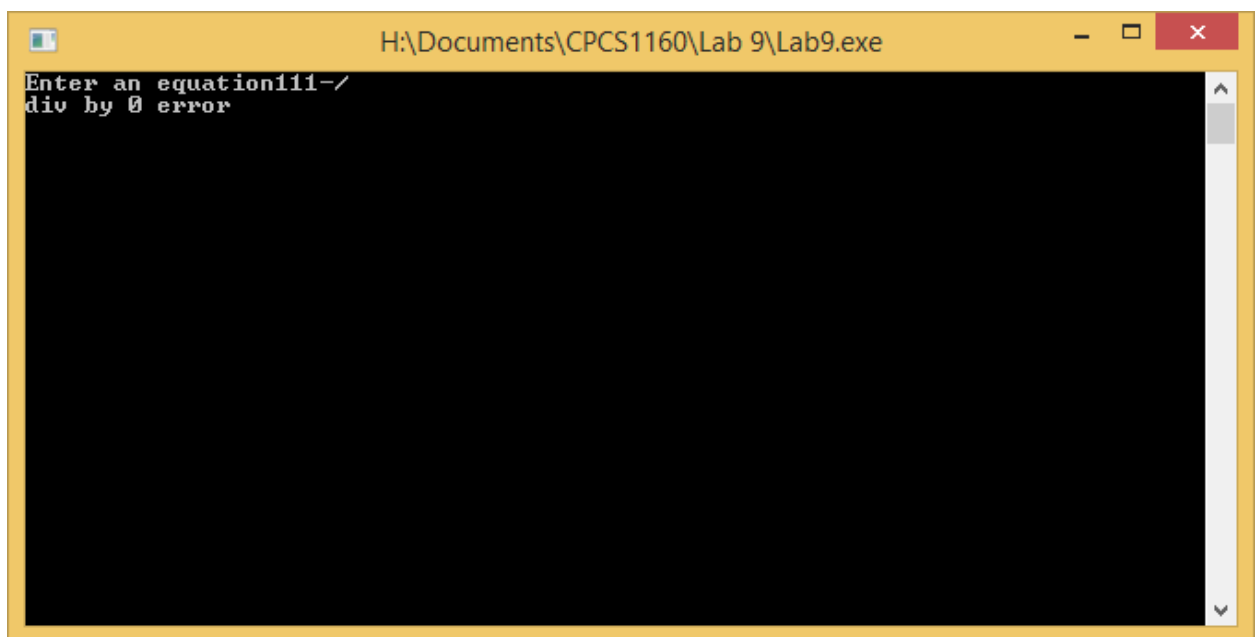

```
H:\Documents\CPCS1160\Lab 9\Lab9.exe
Enter an equation72364-+*/
Solution 0.7
```

```
Enter an equation436-*32-8+
Invalid equation
```

```
Enter an equation111-/
div by 0 error
```
